EXECUTIVE OFFICE OF ENERGY AND ENVIRONMENTAL AFFAIRS

MASSACHUSETTS ENVIRONMENTAL POLICY ACT (MEPA) OFFICE

MEPA Site Meeting Re

 $$\rm EEA\#\ 15444$$ The Commons at Weiss Farm, Stoneham

Before: Alexander Strysky

Held at:
Stoneham Town Hall
35 Central Street
Stoneham, Massachusetts
Wednesday, January 6, 2016
2:06 p.m.

Alexander K. Loos Registered Diplomate Reporter

* * * * *

1 PROCEEDINGS 2 MR. STRYSKY: Good afternoon, everyone. We're just waiting for the recording to get started. 3 MS. McBRIDE: George, are you ready for us? 4 5 Yep. MR. STRYSKY: Okay. Good afternoon, 6 7 everyone. My name is Alex Strysky. I'm from the MEPA office. MEPA stands for Massachusetts 8 Environmental Policy Act, and we're here today 9 10 regarding the Commons at Weiss Farm project, which I'm sure you're all familiar with, which is 11 undergoing review by the MEPA office. 12 13 So I just wanted to say that the -- you 14 know, our meetings are typically very informal. 15 It's not a public hearing, so it will be a 16 combination of a public hearing/informal meeting. So we'll try to keep things organized, but I just 17 wanted to let you know that I will not be taking 18 minutes of the meeting, so really the only way to 19 20 submit comments to us is in writing. I'll get to 21 that later, again. So I'll assume I'll be taking 22 notes of concerns, questions people have, but I just 23 wanted to make you aware that it's not a formal hearing in that sense. 24

So the agenda for the meeting will be that first I'll give a brief overview of the MEPA process; then I'll ask the proponent to give a brief presentation about the project, and then we'll just take questions, or really comments is mostly what I would like to hear. You know, these meetings are really for the benefit of the analysts in that case to get more information about the project that the proponent hasn't provided, to get more information about environmental impacts, about existing conditions and about the concerns of the neighbors or other residents in the town. Okay? So just to start off by saying MEPA is not a permitting process. It's more of a comprehensive review of projects conducted by the Secretary of the Executive Office of Environmental Affairs. Matthew Beaton. And the purpose -- the -- MEPA is invoked when a project requires a state agency action -- typically a permit, but it could be state funding as well, or transfer of state property -and it's -- and the project exceeds certain environmental thresholds that are in our regulations. So in this case, the project requires a superseding order of conditions from DEP, and it

exceeds our environmental threshold for new impervious area, greater than five acres of impervious area.

So the purpose -- MEPA is not a permitting process, but its purpose is to, again, do a comprehensive review of projects, to provide meaningful opportunities for public review of projects, to help state agencies which do have to issue permits or -- or provide financial assistance, or whatever the state agency action is, and to ensure that feasible measures to avoid damage to the environment are taken and analyzed, typically through an alternatives analysis -- which is a very important part of the MEPA review -- and finally to ensure that unavoidable impacts are minimized and mitigated.

So this project, again, was required to file an ENF -- that's Environmental Notification Form -- which is sort of the first step in the MEPA process. It can be also the last step, or it can be the first step followed by environmental impact reports. In this case, the project does not exceed a mandatory threshold requiring an EIR, so the secretary will be reviewing the ENF to determine

whether any further review is warranted through a draft and final environmental impact report.

Let's see. So I also meant to say that our -- the scope of our review mirrors the state agency actions. So one other state permit that may be required is an approval from the Housing and Community Development Department that may issue a permit related to an appeal of the Zoning Board of Appeals' review of the comprehensive permit. So since that agency's permit scope is broad, ours is broad as well. So in this case we'll be covering wetlands, storm water, flooding, traffic, all the major concerns I think that we've heard about so far.

Okay. The secretary will, again, issue a certificate on January 22nd, and that certificate will determine whether the ENF complies with MEPA in the sense that it has documented environmental impacts, considered alternatives, identified minimization and mitigation measures. It's, again, not an approval. It means if the -- if the secretary's certificate states that it complies with MEPA, then the project can go to state permitting, and the state agencies would either approve or deny

the project on its merits.

If the secretary decides on -- in the certificate on January 22nd that it requires further MEPA review, then the certificate would identify a scope of further analysis that's necessary for the proponent to provide in the draft environmental impact report. That then would be subject to another comment period and public review. There would be another certificate on the draft EIR, which would then identify -- you know, review the draft EIR and then it would identify further issues that require analysis in the final impact report.

And then that would be followed by public -- once the final EIR is filed, it would be followed by another public comment period and another certificate on the final EIR.

Okay. So the certificate on the 22nd will identify which path it goes to, whether it's finished with MEPA, the project is finished with MEPA, or whether it requires further review.

And one other -- two other things I wanted to point out is that the comment period is going on until January 12th, so I, unfortunately, don't have a business card. I can provide my e-mail address,

or my mailing address, to anyone who wants to submit comments. We accept comments by fax, by mail, by e-mail, and -- but it should be in by January 12th.

After that time, you know, it makes it more difficult to incorporate your comments or concerns into the certificate.

I just wanted to now backtrack a little bit and just mention why we're here today, rather than a month ago. According to our deadlines, the -- this meeting was originally scheduled for a month ago. Totally by my oversight, I neglected to notify the town boards and departments, so the proponent was -- you know, I mentioned that to the proponent right away, once I realized I hadn't done that when we conducted our site visit.

One thing about MEPA is that we cannot extend comment periods on our own. The secretary does not have the -- the ability to do that. It can only be with the consent of the proponent or whether it -- if the proponent requests an extension. So I wanted to thank the proponent for agreeing to actually two extensions of the comment period so that we could have this meeting within the comment period, you know, again based on initially the -- my

1 failure to notice all the town boards, and then to help schedule this so that people could attend. 2 I just wanted to acknowledge that. 3 Okay. Are there any questions about how 4 the meeting will go? I'll be happy to answer 5 questions about the MEPA process more generally. 6 7 You know, there haven't been any final determinations or decisions made on the project, but 8 if there are any questions about the MEPA process. 9 10 Yes. MR. EATON: What is a superseding order of 11 conditions from DEP? What's that all about? 12 13 MR. STRYSKY: Okay. The -- so the question 14 was whether -- what is a superseding order of conditions. And it's -- in this case there was a 15 permit issued by the -- or a denial, I guess, Issued 16 17 by the Conservation Commission, the Town of Stoneham Conservation Commission, and the process under the 18 Wetlands Protection Act, an appeal -- if the 19 20 proponent appeals that denial -- which happened in 21 this case -- DEP is the agency that makes a ruling 22 about whether a permit should be issued or not. 23 MR. EATON: Do you know what the status of that appeal is? 24

MR. STRYSKY: They cannot finalize their 1 action until MEPA's finished. So if -- you know, 2 again, if there was -- if MEPA is done relatively 3 soon, then they would be progressing along. If MEPA is extended because of an EIR being required, then 5 they would have to wait until that's done. But I 6 7 don't know if -- how far along they've -- DEP has gotten in the analysis, but I know they cannot issue a decision until after MEPA is finished. 9 Yes. 10 MS. McBRIDE: What are the -- do you need 11 name and address for the record? 12 13 What are the mandatory thresholds that would trigger an EIR? 14 15 MR. STRYSKY: Good question. There are a lot of them. Yeah. 16 The ones that might have been applicable 17 here are, let's see, creation of ten or more acres 18 of impervious area, and this was, you know, greater 19 than five but less than ten. 20 21 Let's see. There is wetlands impacts, you 22 know, wetlands projects that require wetlands 23 variances, for example, mandatory EIR. An acre or more of BVW, bordering vegetated wetlands, would be 24

1 a mandatory EIR threshold. 2 But there are also, you know, others -- and traffic and -- but again, the impact has to be 3 related to the state permit that's needed in terms 4 of it being a mandatory. 5 So anyway, there is no DOT -- there is no 6 7 permit required in this case from the Department of Transportation for an access onto a state highway. 8 9 So let's say, just speculatively, if the project had exceeded an EIR threshold for traffic, 10 but there was no permit needed, then that would not 11 serve as a threshold. 12 13 It does exceed a traffic threshold for an ENF, not an EIR. But, again, you know, typically we 14 15 wouldn't even look at the transportation impacts except in this case we have broad scope jurisdiction 16 17 because of the potential appeal to Housing and Community Development. 18 19 Yes. 20 MR. WITTEN: Alex, you are going to hear 21 testimony from me that a categorical threshold is 22 being exceeded --23 MR. STRYSKY: Right.

Doris O. Wong Associates, Inc.

MR. WITTEN:

24

-- and that's the construction

```
1
    of the new dam.
2
             MR. STRYSKY: I meant to get to that.
             We do have a very detailed comprehensive
3
    letter from the town that makes that argument, that
4
    there is a mandatory EIR threshold, also that the
5
    secretary should do a discretionary EIR. So that's
6
7
    something we're taking to -- we're considering now.
    We haven't made a final decision on that. We'll --
    it's something we definitely will consider.
9
10
    didn't want to -- since we haven't decided one way
    or the other, I didn't want to comment on that.
11
12
             Okay. Yes.
13
             MS. HEMINGWAY: Just wondering how long a
14
    process is the EIR, roughly? Any idea?
             MR. STRYSKY: If an EIR were to be
15
    required, then it's really driven by the proponent
16
17
    preparing the draft EIR. They have as long as they
    want, essentially, but once they file with us, then
18
    there is 30 -- 30-day public review and then
19
20
    seven-day period after which the secretary has to
    issue the certificate.
21
22
             So it really depends on how long it takes
23
    them to put everything together and file it with us.
             Any other questions?
24
                                    Okay.
```

```
1
             Well, in that case, I'll turn it over to
2
    the proponent for a brief -- I've asked them to make
    it brief. I know, you know, everyone's familiar
3
    with the project; and, again, I'm really interested
4
5
    in hearing your concerns and comments.
             MR. MAHONEY: So I know everyone is -- I
6
7
    recognize almost every face in here, so I will keep
    it brief. And the project has not changed since our
8
    last public meeting with the Board of Appeals.
9
10
             But just for those who aren't familiar,
    just to orient everyone with the site, this is
11
    Franklin Street out here. This is the existing
12
13
    Weiss Farm farm buildings here. The project site is
    shown here in yellow. The Weiss Farm farmhouse will
14
15
    remain. The triangular portion here is -- will be a
16
    separate lot. Mrs. Weiss would stay as our closest
17
    neighbor. As part of the project, two of the farm
    buildings, two of -- the barn and an adjacent
18
    building would be demolished to allow for the
19
20
    project.
21
             MS. DAY: Peter, the problem is he can't
22
    see.
23
             MR. STRYSKY: I'm fine.
24
             MR. MAHONEY: Thank you.
```

The site's approximately 26 acres. 1 12 of that is wetland. About ten of that in this 2 central area, which we consider the central 3 development area. That's bounded roughly by a 4 drainage moat that follows this line, which is --5 has been delineated wetland. And as part of the 6 7 project, which I'll get to the actual site plan, 8 we've done our best and respected, in almost every instance, the 25-foot no -- no-build line. 9 10 So this is the proposed site layout. Again, Franklin Street out here; the Weiss Farm 11 residential house here, and that's the triangular 12 lot there. The proposal is 259 apartments, 13 organized throughout, again, the central development 14 15 area in five smaller townhouse buildings, which are three stories, and then three larger apartment 16 buildings, which are five stories. They've been 17 oriented so as to minimize visual impacts from the 18 public way out on Franklin Street and to push some 19 20 of the density away from -- away from that area. 21 This line, which you can probably not see 22 very well, is the 25-foot no-build zone. The only 23 portion where we do intrude on that is to propose a

pedestrian crossing of the wetland to allow for some

24

passive recreation space in this area up here, which is upland.

We've focused our kind of central usable amenity space in here. The central development area, I believe, ends up being -- roughly half of it ends up being vegetated open space at the end of the project. Approximately almost 80 percent of the entire site would be vegetated space when the project was completed.

And I'll just touch on -- briefly on some of the traffic. This shows various intersections up and down Franklin Street where we have proposed -- the ones that are circled are proposed as -- all the intersections shown here are intersections that have been studied. Circled intersections show areas where we propose signalization improvements. And then, in addition to that, we've proposed off-site improvements in front of the -- in front of the site entrance, with a left-turn lane shown on Franklin Street here, which would allow for left turn access into the site. And then further down Franklin Street, toward Melrose, we are showing a proposed pedestrian crossing with a HAWK signal, a red light beacon to allow for -- for safe pedestrian access or

```
1
    cross Franklin Street there.
2
             So that's, again, a very brief overview of
3
    the project.
             Thank you. I'll leave these up here.
4
5
             MR. STRYSKY: Okay.
             MR. MAHONEY: Thank you.
6
7
             MR. STRYSKY: So if there are any
8
    questions, maybe some basic questions about the
    project. Otherwise, you know, if people want to
9
    offer testimony, I would appreciate it.
10
11
             Yeah.
             MR. WITTEN: I'll sit at the table,
12
13
    Mr. Strysky.
14
             MR. STRYSKY: Thank you.
15
             MR. WITTEN: So thank you, Alex, for being
    here. My name is Jon Witten, and Barbara Huggins,
16
    my law partner, is here. We are representing, in
17
    this matter, the Stoneham Board of Selectmen, the
18
    Stoneham Board of Appeals, and the Stoneham
19
    Conservation Comission.
20
21
             And as you referenced, we submitted a very
22
    detailed letter to you before the beginning of the
23
    year outlining, particularly from the Conservation
    Comission's and the Board of Appeal's perspective,
24
```

Doris O. Wong Associates, Inc.

1 the environmental impacts of this project. Both boards, especially the Conservation Commission, know 2 this site intimately. They've dealt with it 3 through administrative consent orders for years, and 4 5 the Board of Appeals has been dealing with it intensely since last summer. 6 7 As you noticed, Alex, the MEPA jurisdiction 8 is broad scope, because a permit is required from DEP, and a SOC, superseding order, and a permit 9 10 would likely -- very likely be required from the Department of Housing and Community Development, the 11 Housing Appeals Committee. That broad scope 12 jurisdiction, as you acknowledge, really includes 13 everything that's currently before the Board of 14 15 Appeals, and that's the basis of our comment letter to you. 16 17 The ENF that you've received incorrectly states that there is no financial assistance from an 18 19 agency of the Commonwealth. That's just wrong. 20 Mass. Housing issued a project eligibility letter. 21 The Supreme Judicial Court ruled many years ago that 22 that kind of technical assistance constitutes 23 financial assistance. So there is, in fact, financial assistance from the Commonwealth. 24

The ENF also acknowledges that the land that is the locus is agricultural land and, as such, the proposed project that Mr. Mahoney just presented to you violates the Executive Order 193, the conversion of agricultural land. This land has been agricultural for many, many years. The ENF identifies that at Page 13. And Executive Order 193 states quite clearly and unambiguously that state funds and federal grants administered by the state shall not be used to encourage the conversion of agricultural land to other uses when feasible alternatives are available. And as I'm going to talk about in a minute, the applicant has done nothing to provide MEPA with feasible alternatives.

As I indicated a few minutes ago during your initial opening of questions, the project does trigger a categorical threshold. It's the requirement of a dam. It's 301 CMR 11.03(3). There is no question about it, during the site visit, people overheard the acknowledgement that a new dam is required. The Conservation Comission identified a new dam is required. There isn't anybody who's been on the site that won't testify that a new dam is required. The Applicant can categorize it all it

wants, but it's a new dam, and it's a categorical EIR. That's spelled out quite explicitly in our comment letter.

24

Even if, assuming -- assuming the secretary could conclude that an EIR wasn't categorically required, we would argue most strongly, based on the history of MEPA, that this is a poster child for failsafe review. And the failsafe review would start really from the beginning, which is the extensive history of noncompliance of the locus -not this Applicant, but of this locus -- with administrative consent orders with penalties dating back to 2006 and 2010. The letter we submitted to your office details this extensively, and I certainly won't bore the audience or you with repeating that, but we would ask that to be taken seriously, as well as the most recent enforcement order from last year issued by the Conservation Comission. Weiss Farm, the current owner, complied with none of the enforcement order requirements from 2015 and complied with very few of the 2006 and 2010 enforcement orders.

And the reason it's a poster child for EIR review is this is precisely what MEPA and an EIR is

```
1
    to do, is to look holistically at the environmental
    impacts of a large project, especially where there
2
    has been such an extensive ten-year history of
3
    noncompliance.
4
             The order of conditions that's subject to
5
    the SOC before DEP now speaks very, very
6
7
    specifically to the volume of runoff, the storm
    water impacts of this project. The Applicant,
    throughout its time with the Board of Appeals and
9
10
    the Conservation Comission, has all but said, "It's
    not my problem," and this ENF submitted to your
11
    office says, "It's not my problem." It is their
12
    problem, because it's this site that's generating
13
    this impact of flooding and storm water runoff. And
14
15
    again, the comment letter goes through that in some
16
    detail.
17
             One of the requirements of MEPA, 301 CMR
    11.01(a) is:
18
19
                   "All feasible means to avoid damage to
20
             the environment or, to the extent that
21
             damage to the environment cannot be
22
             avoided, to minimize and mitigate damage
             shall be done to the maximum extent
23
             practicable."
24
```

Doris O. Wong Associates, Inc.

This Applicant proposes nothing. Nothing.

The storm water management of this site, of this proposed project, requires DOT participation.

And again, another underlying purpose of MEPA, to get state agencies together and solve a problem collectively as opposed to piece by piece, death by a thousand paper cuts without MEPA. And this is an opportunity for DOT to join in with DEP to solve the problems exacerbated by this Applicant's proposal.

I think this most striking flaw of the ENF, and maybe the most insulting to our clients, is the fact that there are no meaningful alternatives proposed. In the first application that the developer submitted to MEPA, the Applicant stated

this -- this is the entirety of the project

alternatives analysis, quote:

"Current zoning would allow for single-family residences. However, the developer's experience mainly consists of multifamily development with no recent work in single-family residential development. Further, the developer recognizes the need for affordable housing in suburban towns ...

and the Town of Stoneham has not met the state's minimum threshold for affordable housing."

That's it. Putting aside the fact that the Applicant's wrong about Stoneham meeting it's 40(b) quota, the Applicant has provided as a basis for no alternatives that it doesn't do single-family housing.

Well, that's not an alternatives analysis. We all know what an alternative analysis is. This Applicant has a very sophisticated firm working for it, AECOM. They know what an alternative analysis is, yet none's been submitted to MEPA. Then, upon reflection, the Applicant decided to submit a subdivision plan that is wholly unbuildable on this property as a feigned alternatives analysis.

The purpose of the alternatives analysis, contrary to the Applicant's argument, is not what's good for the developer, but what is good for the land pursuant to the MEPA statute. It's not to examine the most viable or profitable venture for the Applicant, but rather to examine the comparative environmental impacts of the project and alternative uses. The Applicant has failed to do that

miserably. I've never seen, in my entire career in this business, an Applicant who is so fatally flawed in its alternatives analysis. An EIR is required for that reason alone.

An EIR is required, Alex, because the project is completely inconsistent with municipal planning. The Town of Stoneham, through work at and by MAPC, issued the Stoneham Strategic Action Plan. This project violates that from beginning to end. The Applicant ignored the plan in its entirety, entirely because the project is so inconsistent with the plan. An EIR should be required pursuant to the MEPA regs to require an alternatives analysis consistent with town plans, regional plans and plans prepared by MAPC.

The proposed project is grossly inconsistent with the neighborhood and principles of site planning, and that's detailed in our letter. The proposed project is grossly inconsistent with commonsense traffic mitigation requirements, and the most notable -- and then the letter goes into extraordinary detail -- based on the work of the Board's engineer, Jeff Dirk, who is maybe the foremost traffic engineer in the Commonwealth.

Because of the density of the project, 1 Mr. Dirk has testified that a left-turn lane is 2 required. The Applicant has proposed a left-turn 3 lane, but in proposing the left-turn lane on town 4 5 property -- which the Applicant has no right to -the Applicant must wipe out perpetually any 6 7 opportunity for a bike path on Franklin Street. That admission by the Applicant, that requirement to 8 build 259 units, is directly conflicting with the 9 10 Commonwealth's sustainable development plan, directly conflicting with the MEPA regulations 11 regarding the mixed use of roadways, shared 12 roadways, and directly inconsistent with the Town of 13 14 Stoneham's long-term plans for a long-term bike path 15 proposal on Franklin Street. 16 Just to restate that, if I could, Alex, 17 this proposal will perpetually remove any opportunity for a bike path on Franklin Street. 18 Ιf 19 this were private property, we would call it a 20 taking. Well, it's public property, and it's still 21 a taking. An EIR should be required to reduce the 22 scope of the development impact, require an 23 alternatives analysis so a left-turn lane wouldn't 24 be required.

Well, Mr. Dirk has already provided that testimony to the Applicant over the past several months. It's 125 units or less based on traffic engineering standards, and at 125 units or less the Applicant would not need to construct a left-turn lane. So MEPA should require an alternatives analysis showing a project that doesn't require a left-turn lane.

If MEPA were to not require an EIR -- which we would respectfully suggest it can't, but if it would -- we would say that -- or ask, respectfully, that the ENF be conditioned on requiring -- and the letter goes into this in great detail -- discussion and compliance with storm water management impacts, requirements on wetland impacts, requirements to mitigate the impact on the loss of agricultural land pursuant to Executive Order 193, to revise the project in terms of size and scope based on site planning and design requirements, and to remove the project's requirement, or eradicating the left-turn lane, because requiring the left-turn lane requires removal of the bike path.

The purpose of MEPA, Alex -- and, of course, you know this better than anybody in the

```
1
    room -- is not, as the Applicant would suggest, to
    facilitate residential construction. The purpose is
2
3
    to, quote:
                   "Provide meaningful opportunities for
4
             public review of potential environmental
5
             impacts of projects where state action is
6
7
             required using all feasible means to avoid
             damage to the environment or, to the extent
8
             damage cannot be avoided, to minimize and
9
             mitigate damage to the environment to the
10
11
             maximum extent practicable."
             This ENF accomplishes none of that.
12
    weak attempt at getting in the system and trying to
13
14
    bypass MEPA review.
15
             So on behalf of the Board of Appeals, the
    Board of Selectmen and the Conservation Commission,
16
17
    Alex, we would urge you to require an EIR, a
    full-scope EIR for this project.
18
19
             Thank you.
20
             MR. STRYSKY: Thank you.
21
             Would anyone else like to speak?
22
             MR. EATON: My name is John Eaton of 18
23
    Citation Ave. in Stoneham. I have lived here since
    2003.
24
```

Doris O. Wong Associates, Inc.

I submitted a comment letter on the ENF filed by the proponent. I -- I collected some names of -- signatures from citizens -- by "signatures," I just mean name and address; I didn't get them to sign it -- I feel that probably somewhere between 5- and 600 people by e-mail and by written letter to get their comments on my letter. It was a four-page letter. I didn't have any negative comments whatsoever, and I had -- I collected 264 names, which is a -- about roughly a little less than half of the people that I contacted.

Topics that I covered in my letter were inadequate storm water management planning that will likely make the flooding problems worse, potential destruction of remaining wetlands because of building within 100 feet of the wetlands perimeter as laid out in the -- in our -- in our Chapter 11 of our wetlands, local wetlands code. The developer doesn't give a darn about our wetlands code because they say, "Well, we just comply with the state requirements." Well, whoever put that in our provision, put that in our town code, they got that information from someplace; they're not just making it up, and they clearly do have construction within

that -- that 100 feet -- foot perimeter.

The -- the potential destruction of our -the unacceptable increase in the traffic congestion
and related vehicle emissions is another huge issue.
The -- they did have a study. They say that it's
just going to increase the traffic 9.7 percent on
Franklin Street. Like that's, you know, just not
any big deal. Well, there is already too much
traffic and congestion on Franklin Street.

Franklin Street is a narrow road which serves as an access way for three major highways, and there are a lot of single-family homes, condos, apartments, the high school and all this stuff, and Colonial Park School.

And the traffic study, traffic impact and access study that's in the comprehensive permit discusses the levels of service to evaluate traffic flow. You're probably familiar with that, where they have these six lettered rankings. And their own study shows that the -- at the intersection of the -- of the project driveway with Franklin Street is going to be rated at the worst possible designation during the peak hours. And that is the worst, the worst designation.

```
1
             And the letter from the police
    department -- from the police department to Robert
2
    Saltzman of the Board of Appeals, Chief McIntyre
3
4
    says:
                   "I am" -- I'm quoting here -- "I am
5
             concerned that operators attempting to exit
6
7
             the site during these times will begin to
             experience frustration and take risks in
8
             order to merge into traffic, thus
9
             increasing the potential for a vehicle
10
             crash."
11
             And I did get a letter from one -- someone
12
    who -- who experienced that very thing. She -- I'm
13
    not going to mention her name; I don't want to get
14
    her in trouble. But she drove across a curb and
15
    across a road -- across her lawn to get out onto the
16
17
    road on Franklin Street. It really is a -- a huge
    factor.
18
19
             And then, of course, there is the taking of
    the 100-foot segment of our -- of our bike lane
20
21
    along -- along Franklin Street, which is -- which
22
    has already been discussed.
23
             And the bottom line is all these things --
```

Doris O. Wong Associates, Inc.

and the details are in my letter, but all these

24

```
1
    things will negatively impact the environment and
2
    quality of life in Stoneham, and I don't see
    anything in the ENF that mitigates these problems.
3
    As a matter of fact, they actually make existing
4
5
    problems worse as I -- as I explained, and I think
    the developer -- the developer ought to -- ought to
6
7
    respond to these specific issues.
8
             I received many e-mails and letters from
9
    people expressing their dismay about this oversized
10
    development at Weiss Farm. I would like to read
    just one brief letter from a Stoneham resident. She
11
    couldn't be here today, but I have her permission to
12
13
    read it.
14
             Her name is Marilyn Danico. She is a
    senior citizen who lives on Carmen Ave. off East
15
16
    Street, north of the Weiss Farm. She moved here
17
    from Illinois, and she's raised four children in
    Stoneham.
18
                   "December 8th, 2015.
19
                   "Dear John,
20
21
                   "Thank you so much for contacting me
22
             regarding the Weiss Farm apartment project.
23
             I have lived in the same house in Stoneham
24
             for 52 years and am very concerned about
```

the project, what this project will do to the quality of our town. I would like my name added to your letter.

"Sincerely, Marilyn Danico."

Now, I really think we should listen to our senior citizens because they have -- they have seen a lot of life, and they know what can happen when a town loses control of -- of development. We're talking about people here, not statistics, and how the environment, quality of life and daily living will be impacted. And I often think that the government doesn't always look at the big picture here.

I live in the Colonial Park area where my neighbors will be soon witnessing the construction of two nearby oversized projects: One being the Weiss Farm 40(b), just to the north of us, with its 264 apartments and all those parking places and 1700 additional vehicle trips. The other project, which is just south of us, is Langwood Commons. That will have 261 apartments and several buildings. And that was another former -- former 40(b), as I understand it. This development, together with that office park of 225,000 square feet and 45 additional daily

```
1
    vehicle trips, all that is going to require
    extensive modification to Woodland Road alongside
2
    Spot Pond and change that area of the town forever.
3
             So I know we're here to discuss the Weiss
4
5
    Farm project, but my broader question, which I would
    like to hear you answer, is, is there any state
6
7
    government department, such as your agency, that --
    do they ever stop to look at the big picture to see
    what's happening to our communities? I mean, we're
9
    not the only one. I understand there is a plan to
10
    build 53,000 new housing units in the Greater Boston
11
    area by 2030.
12
13
             When you look at one project at a time,
14
    each individual project has limited impact, but when
15
    you see that it's part of a plan to build oversized
    apartment projects using the coercive power of a
16
17
    40(b) process, it affects real people, their
    environment, their daily living and their quality of
18
    life, and -- and my impression is that the
19
20
    Massachusetts government has -- has forgotten that.
21
             Thank you.
22
             MR. STRYSKY: Anyone else like to make
23
    comments?
             MS. HEMINGWAY: My name is Cindy Hemingway.
24
```

I live in 14 Fells Road in Stoneham, and I'm a member of the bikeway greenway committee, and I'm very, very concerned when I hear that the bike lane would be eliminated because of the left-hand turn lane. And the reason for this is because we are on the cusp of building a greenway, a bikeway greenway that we've been waiting for 30 years to make happen, and, keeping fingers crossed, we're hoping it's going to happen in the next couple of years.

This is going to increase exponentially the bike traffic in this town: Kids, adults, commuting from town to town, whatever. So to eliminate that bike lane to me is a grave, grave error, if that were to happen, because that would put a lot of cyclists who would like to use Franklin Street -- Melrose already has part of Franklin Street already painted with lines indicating to drivers that they need to be aware to share Franklin Street with cyclists. They already have the lines painted. They redid the section of Franklin Street in Melrose Highlands area, and these painted lines are ready. And I'm, like, "This is terrific." And then I hear that if this project goes through, that our much-needed bike lane along that stretch of Franklin

```
1
    Street in Stoneham would be eliminated, and I think
    that's -- that would be really bad for all -- all
2
    cyclists in the total area: Melrose, Stoneham,
3
    Wakefield, Reading, all the people that would be
4
5
    coming to Stoneham to use our brand new greenway,
    this would be bad news.
6
7
             Thank you.
8
             MR. STRYSKY: Thank you.
9
             I'm sorry.
             MS. McBRIDE: Sorry, Marty.
10
11
             MR. WANTMAN: Are you up?
             MS. McBRIDE: Ellen McBride, 30 Butler
12
13
    Ave., and I'm co-chair of the Conservation
14
    Commission. I just have one question for Peter.
15
             In your presentation you said 80 percent of
    the site would be vegetated after the project is
16
17
    complete.
             How much of it is vegetated now? I don't
18
19
    know if you have that.
             MR. MAHONEY: I don't have the number.
20
21
             MS. McBRIDE: But isn't it true that -- of
22
    the 26 acres, how much of it is buildable?
23
             MR. MAHONEY: Well, about 12 upland acres.
             MS. McBRIDE: So that means how much of it
24
```

```
MEPA Site Meeting - January 6, 2016
                                                           34
1
    are you going to build on of the 26 that's there
2
    now?
3
             MR. MAHONEY: The central development area
    is about ten acres.
4
             MS. McBRIDE: So that tells me, then, if I
5
    can do my math right, 16 of the acres -- my point
6
7
    is, basically, 80 percent of it is -- pretty much
8
    already is green. So to make it seem like you're
    going -- it felt like you were saying, "We're going
9
    to convert it to green space, " or vegetated, and I
10
    just want to make it clear that it is currently
11
    wetlands, most of it, and vegetated. So that's all.
12
13
    I just want to say that.
14
             MR. STRYSKY: Okay. Thanks.
15
             MS. McBRIDE: Thanks, Peter.
16
             MR. WANTMAN: May I use the map that he --
17
             MR. STRYSKY: Sure.
             MR. WANTMAN: I don't know. Either one of
18
    these would work.
19
             MS. McBRIDE: There is an easel back there.
20
21
             MR. STRYSKY:
                           Do you want the easel.
22
             MR. WANTMAN: Can you see, Alex? Is this
23
    good for you?
```

Doris O. Wong Associates, Inc.

Yeah.

MR. STRYSKY:

24

MR. WANTMAN: This is a wonderful map. 1 2 could see from my chair that my property was flooded on a sunny day by looking at this map. It will be 3 difficult for other people to see. 4 This is my property over here, and there is 5 an incursion of water. This is a sunny day. 6 7 is not a puddle to be found anywhere, but the abutters to Weiss -- that would be me, or one of the abutters to Weiss is currently experiencing 9 10 flooding. 11 This is an issue that's been going on --I've only been there for 31 years. I moved there in 12 13 1984. But documents that were submitted to the 14 Zoning Board of Appeals indicated that this was -this has been an issue since, I believe, 1961. 15 16 One of the main problems here is this J-hook that I call it was installed allegedly under 17 the direction of the DEP, but I have found no 18 evidence to that effect. And the water used to 19 20 flow -- well, can I just rearrange this? 21 So now we're looking to the north. This is 22 to the east, and this is to the west. This is fill 23 that went in from the mid '60s to the mid '70s that has made it impossible for Weiss to drain as they 24

had prior to the mid '50s.

In the mid '50s this ditch did not exist, and currently the water from the new development --well, I call it "new." It was 1986 to 1987, the Ellen Road and Tamarock Terrace extension that was cut out of Weiss Farm was designed with the water entering Weiss Farm and flowing west. It cannot leave Weiss Farm. It backs up over here and returns and flows south, floods my property and then creates flooding issues on Sunset Street across the street, as it goes across the street.

The documents submitted, the 22 pages by Attorney Witten, was impressive and very inclusive, but I've lived there for 31 years.

In the year 2000, the Department of
Transportation -- which I never thought would ever
have an opportunity to correct the problems that
they exacerbated in 2000 -- essentially rebuilt the
culvert by the pump house and installed five drains
along Franklin Street -- if I can find it; that
would be in this area right here -- and they
directed the water from the southern lanes of
Franklin Street back onto Weiss, and back onto my
property.

So that was done in the year 2000. The town engineer has a record of it. The plans were noted, I believe by the town engineer, that an 18-inch pipe was supposed to be installed to better drain the water from Weiss so that it could flow off of the property. My last visual observation — which was years ago, but after 2000 — indicated that there are two 12-inch pipes. There was never change to an 18-inch pipe. And the two 12-inch pipes don't convey water as fast as an 18-inch pipe would be. Consequently, the water backs up on Weiss and causes flooding.

Some of the other major problems that have occurred on the property are actually in my -- in my estimation the flooding has been -- gotten worse. This photograph was taken after 2006, because this was installed in 2006, and my flooding, I could stay underwater, or this area of my property would stay underwater 12 to 13 months at a time.

During that 2006 executive -- I mean administrative consent order with the DEP, Weiss installed what they call a pump access road right here in this red line over here (indicating). This pump access road was put in the wetlands to the

```
1
    north side of Franklin Street and forces water to
2
    the north and takes away storage capacity,
    thereby -- thereby worsening the flooding situation.
3
    They -- when the pump needs repair, the pump access
5
    road is underwater. The pump house was built with a
    hinged roof. I've seen the pump replaced without
6
7
    the pump access road since I've lived there since
8
    1984.
             Weiss has owned this property I think since
9
    about 1928. This is treacherous property, and this
10
    is treacherous property, both in the summertime and
11
    in the wintertime. I have gone into here
12
    inadvertently and been lucky to drag myself back
13
    out. It's really -- it's almost like quicksand.
14
    It's freetown muck.
15
             In this area here, just parallel with my
16
17
    tennis court, in approximately 1994, Weiss
    transferred material from what they call a berm,
18
    which I call a rough fill pile, jammed it into the
19
20
    wetlands. And their lawyer wrote that they were
21
    maintaining that material there so that they could
22
    clean out the main ditch.
23
             The main ditch actually runs over here.
    It's totally silted over and flows in the wrong
24
```

direction, to the north. It was intentioned to flow to the south.

I wrote to the Executive Office of
Environmental Affairs and, as Weiss had written in
2005, this material was placed here in order to
support equipment to assist in cleaning out the main
ditch. The main ditch was never cleaned out. The
material was left there. A commonsense idea would
be to use that pad, while it's there, clean out the
main ditch -- and I will make note that Cochran
supplied to either the Conservation Comission or the
Zoning Board of Appeals a document entitled
"existing conditions with abutters," and it does not
depict the main ditch.

Another problem is that this area up here is treacherous and difficult to get to. There is an elevation change in this area here. The wetlands have already been abused. There is a historical dump in this area that nobody has yet to discover, and that's a great reason to trigger an environmental impact review. And there is significant rough fill stretching 110 feet long, and approximately 20 feet long -- 20 feet wide in this area intended to clean out the main ditch.

In 1994, when they aborted -- after they placed the material abutting my property in the wetlands, they aborted the project and cut a right-hand cross ditch into the secondary ditch.

Let me see if there is anything else I've written down.

A simple thing that hasn't been done is a dye test hasn't been done. That wouldn't cost a lot of money, and it might be indicative as to where the problems might lie.

And just a quick second.

Concerning, or emphasizing triggering an environmental impact review, which I'm in favor of, which the town and Jon Witten eloquently spoke about, Mr. Witten indicated that the Applicant has often spoke about repairing the weir or repairing the dam.

In actuality, on Page 9 of the environmental notification form submitted to you, they indicated they intend to implement improvements to the existing weir, and on Page 18, the Applicant indicates that there will be no alteration to a dam. In my mind the weir is a dam, and both of those cannot be true. If that's not true, then an

```
1
    environmental impact review has to be triggered.
    When I wrote to your department, I did not
2
    understand the intent of what I was writing about,
3
    but I picked up on a lot of the aspects that the
4
    town did, and I'm firmly behind further review of
5
    this project as the flooding has been continuous and
6
7
    notorious for a good 50 years.
8
             Thank you.
             MR. STRYSKY: Thank you.
9
             Would anyone else like to make a comment or
10
    questions? Anyone else?
11
             Okay. Great. Well, in that case, that
12
13
    will conclude the meeting. I would just remind you,
14
    if you haven't signed in, to please do so before you
15
    leave.
             I can -- I don't know. Maybe I can e-mail
16
    this to you and distribute it, but our decisions are
17
    posted on the MEPA website. This one will be,
18
    again, issued on the 22nd. So that's a Friday.
19
20
    Either by the 22nd, maybe not until the Monday, the
21
    certificate will be posted on -- on the recent
22
    decisions page of the MEPA website. So that's how
23
    we distribute our notices, our certificates.
             And again, if you would like to submit
24
```

Doris O. Wong Associates, Inc.

```
1
    comments, I would again urge you to e-mail, fax,
    letter. If you would like my contact information,
2
    please see me; I'll give it to you. And I believe
3
    it might be posted on the town's website as well, as
    far as the notice for this meeting.
5
             So if there are no other questions --
6
7
             MS. McBRIDE: I have a process question.
8
             MR. STRYSKY: Uh-huh.
             MS. McBRIDE: So on the 22nd, if you
9
    issue -- say the ENF was enough and it goes back to
10
    DEP, will they then have any additional public
11
    hearings? Or is it just a matter of waiting for
12
13
    them to make their decision?
14
             MR. STRYSKY: I think the latter. I'm not
15
    sure, though. You probably are in touch with the
    folks who are doing that process. I would consult
16
    with them, but I know they've had their site visit
17
    here already, right.
18
19
             MS. McBRIDE: Uh-huh. And have you had a
20
    site visit?
21
             MR. STRYSKY: Well, this is it,
22
    essentially. Right.
23
             MS. McBRIDE: So you won't actually walk --
    MEPA does not walk the property?
24
```

```
MR. STRYSKY: Well, we had a site visit.
1
    This was the initial one when I didn't notify the
2
    town. So I saw the site at that time. So this is,
3
    you know, because there wasn't adequate public
4
    notice, we're doing it, having this meeting instead.
5
             MS. McBRIDE: Would there be any benefit to
6
7
    doing it with representatives from the town?
             MR. STRYSKY: Well, I would be happy to go
8
    out there. The proponent has indicated that they
9
10
    don't want the public access to the site, so, you
    know, for that reason I won't -- there is no point
11
    to go out there again. If there is something you
12
    wanted to point out from the street, I would be
13
14
    happy --
             MS. McBRIDE: So is that normal that the
15
    bodies in a town that are hearing the case, for lack
16
17
    of a better word, don't accompany you on --
             MR. STRYSKY: No. Well, our policy is sort
18
19
    of that if, for whatever reason, the proponent
    doesn't believe it's safe or doesn't want to grant
20
21
    access to the -- they haven't said it's not safe;
22
    they just said the owner doesn't want to allow
23
    public access.
             But for whatever reason, our policy is that
24
```

```
1
    if the -- if the public isn't allowed onto the site,
    then we'll just conduct -- we'll make other
2
    arrangements and get with the public. We typically
3
    wouldn't go onto the site.
4
             MS. McBRIDE: So the boards in town would
5
    be considered public in your --
6
7
             MR. STRYSKY: Yes. Right.
8
             MS. McBRIDE: Okay.
             MR. STRYSKY: Yep.
9
             So I would be happy to stay behind and chat
10
    if anyone would like to do that, or we can go out to
11
    take a look at certain areas. I didn't expect this
12
    to be done during the daylight, either. So...
13
14
             One more question?
                                  Yeah.
15
             MR. WANTMAN: If I could just say one other
16
    thing.
             Concerning opening up the northwesterly
17
    ditches that I pointed to, that's in here where the
18
    water historically used to flow across here.
19
20
             The map doesn't show it, but the
21
    infrastructure and the water capacity exists on
22
    Doleful Pond. It would travel to Doleful Pond,
23
    which is almost dry, and I understand there used to
    be fish that lived in there at one time. It's a
24
```

MEPA Site Meeting - January 6, 2016

```
45
1
    massive area that would let the water flow by
    gravity, as it did prior to the alterations that
2
3
    occurred that stopped it from flowing west.
4
              Thank you.
5
              MR. STRYSKY: Okay. Well thank you, again.
              MS. McBRIDE: Thanks for coming.
6
7
                   (Whereupon, the meeting was
                   concluded at 3:00 p.m.)
